#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with the National Association of Insurance Commissioners ("NAIC") Annual Statement Instructions and NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported periods. Actual results could differ from those estimates. The most significant estimates include those used in determining the liability for aggregate reserves for future benefits. Although some variability is inherent in these estimates, management believes the amounts provided are adequate.

#### C. Accounting Policy

Annuity considerations are recognized as revenue when received.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- Short-term investments include all investments whose remaining maturities, at the time of acquisition, are one year or less and are stated at amortized cost.
- Other than loan-backed and structured securities, investments in unaffiliated bonds rated in NAIC classes 1 through 5 are carried at amortized cost, and unaffiliated bonds rated in NAIC class 6 are carried at the lower of amortized cost or fair value.
- The Company has no investments in common stocks.
- The Company has no investments in preferred stocks.
- The Company has no investments in mortgage loans.
- The Company has no investments in loan-backed bond and structured securities.
- The Company has no investments in subsidiaries.
- The Company has no investments in joint ventures, partnerships, and limited liability companies.
- The Company has no investments in derivatives.
- The Company considers anticipated investment income as a factor in the premium deficiency calculation in accordance with SSAP No. 54 - Revised, Individual and Group Accident and Health Contracts.
- The Company does not have any accident and health policies.
- The Company's capitalization policy changed effective January 1, 2020 when the Company adopted the revisions to SSAP No. 16R – Electronic Data Processing Equipment and Software related to customer's accounting for the implementation cost incurred in a cloud computing arrangement that is a service contract. The Company adopted the guidance on a prospective basis to all implementation costs incurred after the date of adoption. Upon adoption, hosting arrangements that are service contracts will capitalize implementation costs as nonoperating system software and report them as a nonadmitted asset. These implementation costs will be recognized as each component of the hosting arrangement is ready for its intended use. Hosting arrangements that are not service contracts will be amortized over the lesser of the term of the hosting agreement for up to five years. This change in policy did not have a material impact on the financial statements.
- The Company has no pharmaceutical rebate receivables.

#### D. Going Concern

The Company is not aware of any conditions or events which raise substantial doubts concerning the Company's ability to continue as a going concern.

### Note 2 - Accounting Changes and Corrections of Errors

#### Accounting Changes

In 2020, the NAIC revised SSAP No. 32 – Preferred Stock to update definitions, measurement, and impairment guidance for preferred stock. Adoption of this guidance modified the measurement of the Company's perpetual preferred stock with NAIC ratings 1-3 from amortized cost to fair value. This was

**NOTES TO FINANCIAL STATEMENTS**

---

effective January 1, 2021, with early adoption permitted in 2020. The Company adopted this guidance in 2021, and the impact was not material to the Company.

In 2020, the NAIC adopted revisions to SSAP No. 86 – Derivatives to ensure reporting consistency for derivatives with financing components. The Company adopted these revisions effective January 1, 2021 as required by the guidance. The revised guidance requires reporting derivatives gross of any amounts owed to/from the reporting entity from the acquisition or writing of the derivative (derivative premiums payable and receivable). Upon adoption, the Company will separately report derivative premiums payable and receivable as components of Receivables from securities and Payables for securities reflecting amounts currently netted in Derivatives assets and Derivatives liabilities for derivatives which include financing components.

In 2020, the NAIC adopted SSAP No. 108 - Derivatives Hedging Variable Annuity Guarantees. This standard establishes statutory accounting principles to address certain limited derivative transactions hedging variable annuity guarantees subject to fluctuations as a result of interest rate sensitivity. It was effective January 1, 2020, and there was no impact upon adoption of this guidance.

*Recently Issued Accounting Standards*

In 2021, the NAIC expanded the scope of SSAP No. 32 – Revised Preferred Stock to include publicly traded preferred stock warrants and will be accounted for as perpetual preferred stock at fair value. Previously, publicly traded preferred stock warrants were accounted for under SSAP No. 86 at fair value. The Company adopted this guidance in 2021, however, is not material to the Company.

In 2021, the NAIC revised SSAP No. 43 – Residual Tranches to ensure consistency for the reporting of non-rated residual tranches. The revised guidance requires the non-rated residual tranches to be reported on Schedule BA at lower of cost or fair value, as opposed to Schedule D-1 at amortized cost, by assigning an NAIC 5GI designation. This guidance is effective December 31, 2022, with early adoption permitted, however, if an entity does not early adopt these provisions in 2021 any non-rated residual tranches reported under Schedule D-1 should be reported with an NAIC 6 designation. The Company adopted this guidance in 2021, however, is not material to the Company.

In all states, insurers licensed to transact certain classes of insurance are required to become members of a guaranty fund. In most states, in the event of the insolvency of an insurer writing any such class of insurance in the state, members of the funds are assessed to pay certain claims of the insolvent insurer. A particular state's fund assesses its members based on their respective written premiums in the state for the classes of insurance in which the insolvent insurer was engaged. Assessments are generally limited for any year to one or two percent of premiums written per year, depending on the state.

Under insurance guaranty fund laws in each state, the District of Columbia and Puerto Rico, insurers licensed to do business can be assessed by state insurance guaranty associations for certain obligations of insolvent insurance companies to policyholders and claimants. Part of the assessments paid by/refunded to the Company pursuant to these laws may be used as credits for a portion of the associated premium taxes. ## NOTES TO FINANCIAL STATEMENTS

### Note 20 - Fair Value Measurements

#### A. Fair Value Measurements

Fair value is determined based on the "exit price" notion which is defined as the price that would be received to sell an asset in the principal or most advantageous market for the asset in an orderly transaction between market participants. The Company's Separate Account assets are held at fair value.

The Company's investment manager for the Company's general account (a registered investment adviser under the Investment Advisers Act of 1940), with oversight by the Company's Investment Management Department and its Finance and Investment Committee ("FIC"), a committee co-chaired by the Chief Investment Officer and the Chief Risk Officer of the Company, estimates the fair value for financial assets held in the Company's general account and guaranteed separate accounts based on the framework established in the fair value accounting guidance. The Company reviews its investment manager's pricing policy on a periodic basis, with any changes to be approved by the FIC. The Company reserves the right to take exception to its investment manager's pricing of a particular asset and, with FIC's approval, to adjust the price received from its investment manager for that particular asset. The following section applies the fair value hierarchy and disclosure requirements for the Company's Separate Account assets, and categorizes the inputs in the valuation techniques used to measure fair value into three broad Levels (Level 1, 2, or 3):

- Level 1 Unadjusted quoted prices for identical assets in active markets that the Company has the ability to access at the measurement date. Level 1 securities include open-ended mutual funds reported in Separate Account assets.
- Level 2 Observable inputs, other than quoted prices included in Level 1, for the asset or prices for similar assets. Certain short-term investments reported in Separate Account assets are model priced by vendors using observable inputs and are classified within Level 2.
- Level 3 Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk). Because Level 3 values, by their nature, contain one or more significant unobservable inputs as there is little or no observable market for these assets and liabilities, considerable judgment is used to determine the Level 3 fair values. Level 3 fair values represent the Company's best estimate of an amount that could be realized in a current market exchange absent actual market exchanges.

In many situations, inputs used to measure the fair value of an asset may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value. In most cases, both observable (e.g., changes in interest rates) and unobservable (e.g., changes in risk assumptions) inputs are used in the determination of fair values that the Company's investment manager has classified within Level 3. Consequently, these values and the related gains and losses are based upon both observable and unobservable inputs. The Company's bonds included in Level 3 are classified as such because these securities are primarily within illiquid markets and/or priced by independent brokers.

1. The following table presents assets carried at fair value by hierarchy level:

December 31, 2021				
(Amounts in thousands)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
a. Assets accounted for at fair value				
Separate Account assets	\$ 16,656	\$ —	\$ —	\$ 16,656
Total assets accounted for at fair value	\$ 16,656	\$ —	\$ —	\$ 16,656
b. Liabilities accounted for at fair value				
N/A	\$ —	\$ —	\$ —	\$ —
Total liabilities accounted for at fair value	\$ —	\$ —	\$ —	\$ —

Fair values and changes in the fair values of Separate Account assets generally accrue directly to the policyholders and are not included in the Company's revenues and expenses or surplus.

#### Valuation Techniques, Procedures and Controls

The Company determines the fair values of certain financial assets and liabilities based on quoted market prices where available and where prices represent reasonable estimates of fair value. The Company also determines fair values based on future cash flows discounted at the appropriate current market rate. Fair values reflect adjustments for counterparty credit quality, the Company's default spreads, liquidity and, where appropriate, risk margins on unobservable parameters.

The fair value process is monitored by the Valuation Committee of the Company's investment manager, which is a cross-functional group of senior management that meets at least quarterly. The purpose of the committee is to oversee the pricing policy and procedures by ensuring objective and reliable valuation practices and pricing of financial instruments as well as addressing valuation issues and approving changes to valuation methodologies and pricing sources. There are also two working groups under the Valuation Committee of the Company's investment manager, a Securities Valuation Group and a Derivatives Valuation Group, which include various investment, operations, accounting, compliance and risk management professionals that meet on a regular basis, to review market data trends, pricing and trading statistics and results, and any proposed pricing methodology changes.

In addition, the Finance and Investment Committee of the Company, co-chaired by its Chief Investment Officer and Chief Financial Officer, is responsible for the approval and monitoring of the Valuation Policy of the Company as well as the adjudication of any valuation disputes thereunder. The Valuation Policy addresses valuation of all financial instruments held in the general account and guaranteed separate accounts of the Company, including all derivative positions. The Finance and Investment Committee meets regularly, and its members include a cross-functional group of senior management as well as various investment, accounting, finance, and risk management professionals.

The Company also has an enterprise-wide Operational Risk Management function which is responsible for establishing, maintaining and communicating the framework, principles and guidelines of the Company's operational risk management program. This includes model risk management which provides an independent review of the suitability, characteristics and reliability of model inputs as well as an analysis of significant changes to current models.

## NOTES TO FINANCIAL STATEMENTS

### Bonds and Stocks

The fair values of bonds and stocks in an active and orderly market (e.g., not distressed or forced liquidation) are determined by the Company's investment manager using a "waterfall" approach utilizing the following pricing sources: quoted prices for identical assets or liabilities, prices from third-party pricing services, independent broker quotations, or internal matrix pricing processes. Typical inputs used by these pricing sources include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates. Most bonds do not trade daily. Based on the typical trading volumes and the lack of quoted market prices for bonds, third-party pricing services utilize matrix pricing to derive security prices. Matrix pricing relies on securities' relationships to other benchmark quoted securities, which trade more frequently. Pricing services utilize recently reported trades of identical or similar securities making adjustments through the reporting date based on the preceding outlined available market observable information. If there are no recently reported trades, the third-party pricing services may develop a security price using expected future cash flows based upon collateral performance and discounted at an estimated market rate. Both matrix pricing and discounted cash flow techniques develop prices by factoring in the time value for cash flows and risk, including liquidity and credit.

Prices from third-party pricing services may be unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations which utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

The Company's investment manager utilizes an internally developed matrix pricing process for private placement securities for which the Company is unable to obtain a price from a third-party pricing service. The process is similar to the third-party pricing services. The Company's investment manager develops credit spreads each month using market based data for public securities adjusted for credit spread differentials between public and private securities which are obtained from a survey of multiple private placement brokers. The credit spreads determined through this survey approach are based upon the issuer's financial strength and term to maturity, utilizing independent public security index and trade information and adjusting for the non-public nature of the securities. Credit spreads combined with risk-free rates are applied to contractual cash flows to develop a price.

The Company's investment manager performs ongoing analyses of the prices and credit spreads received from third parties to ensure that the prices represent a reasonable estimate of the fair value. In addition, the Company's investment manager ensures that prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models utilizing spreads, and when available, market indices. As a result of these analyses, if the Company's investment manager determines that there is a more appropriate fair value based upon the available market data, the price received from the third party is adjusted accordingly and approved by the Valuation Committee of the Company's investment manager.

The Company's investment manager conducts other specific monitoring controls around pricing. Daily, weekly and monthly analyses identify price changes over pre-determined thresholds for bonds and equity securities. Monthly analyses identify prices that have not changed, and missing prices. Also on a monthly basis, a second source validation is performed on most sectors. Analyses are conducted by a dedicated pricing unit that follows up with trading and investment sector professionals and challenges prices with vendors when the estimated assumptions used differs from what the Company's investment manager feels a market participant would use. Examples of other procedures performed include, but are not limited to, initial and ongoing review of third-party pricing services' methodologies, review of pricing statistics and trends and back testing recent trades.

The Company's investment manager has analyzed the third-party pricing services' valuation methodologies and related inputs, and has also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Most prices provided by third-party pricing services are classified into Level 2 because the inputs used in pricing the securities are observable. Due to the lack of transparency in the process that brokers use to develop prices, most valuations that are based on brokers' prices are classified as Level 3. Some valuations may be classified as Level 2 if the price can be corroborated with observable market data.

### Valuation Inputs for Separate Account Assets

Separate Account assets are primarily invested in mutual funds but also have investments in bonds and stocks. For Level 1 investments, valuations are based on observable inputs that reflect quoted prices for identical assets in active markets that the Company has the ability to access at the measurement date.

For the Separate Accounts' Level 2 bond securities, typical inputs used by pricing techniques include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates.
