Note 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Talcott Resolution International Life Reassurance Corporation (the "Company" or "TIL") have been prepared in conformity with statutory accounting practices prescribed or permitted by the State of Connecticut Insurance Department ("the Department"). The Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company and for determining solvency under the State of Connecticut Insurance Law. The National Association of Insurance Commissioners' Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed practices by the State of Connecticut.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed by the Department is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with the National Association of Insurance Commissioners ("NAIC") Annual Statement Instructions and NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported periods. Actual results could differ from those estimates. The most significant estimates include those used in determining the liability for aggregate reserves for future benefits and the liability for premium and other deposit funds. Although some variability is inherent in these estimates, management believes the amounts provided are adequate.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- Short-term investments include all investments whose remaining maturities, at the time of acquisition, are one year or less and are stated at amortized cost.
- 2. Other than loan-backed and structured securities, investments in unaffiliated bonds rated in NAIC classes 1 through 5 are carried at amortized cost, and unaffiliated bonds rated in NAIC class 6 are carried at the lower of amortized cost or fair value.

The Company adopted the guidance on a prospective basis to all implementation costs incurred after the date of adoption. Note 2 - Accounting Changes and Corrections of Errors

Accounting Changes

In 2020, the NAIC revised SSAP No. 32 – Preferred Stock to update definitions, measurement, and impairment guidance for preferred stock. Adoption of this guidance modified the measurement of the Company's perpetual preferred stock with NAIC ratings 1-3 from amortized cost to fair value. This was effective January 1, 2021, with early adoption permitted in 2020. The Company adopted this guidance in 2021, and the impact was not material to the Company.

In 2020, the NAIC adopted revisions to SSAP No. 86 – Derivatives to ensure reporting consistency for derivatives with financing components. The Company adopted these revisions effective January 1, 2021 as required by the guidance. The revised guidance requires reporting derivatives gross of any amounts owed to/from the reporting entity from the acquisition or writing of the derivative (derivative premiums payable and receivable). Upon adoption, the Company will separately report derivative premiums payable and receivable as components of Receivables from securities and Payables for securities reflecting amounts currently netted in Derivatives assets and Derivatives liabilities for derivatives which include financing components.

Recently Issued Accounting Standards

In 2021, the NAIC expanded the scope of SSAP No. 32 – Revised Preferred Stock to include publicly traded preferred stock warrants and will be accounted for as perpetual preferred stock at fair value. Previously, publicly traded preferred stock warrants were accounted for under SSAP No. 86 at fair value. The Company adopted this guidance in 2021, however, is not material to the Company.

In 2021, the NAIC revised SSAP No. 43 – Residual Tranches to ensure consistency for the reporting of non-rated residual tranches. The revised guidance requires the non-rated residual tranches to be reported on Schedule BA at lower of cost or fair value, as opposed to Schedule D-1 at amortized cost, by assigning an NAIC 5GI designation. This guidance is effective December 31, 2022, with early adoption permitted, however, if an entity does not early adopt these provisions in 2021 any non-rated residual tranches reported under Schedule D-1 should be reported with an NAIC 6 designation. The Company adopted this guidance in 2021, however, is not material to the Company.

B. Assessments

Liability and Related Asset

In all states, insurers licensed to transact certain classes of insurance are required to become members of a guaranty fund. In most states, in the event of the insolvency of an insurer writing any such class of insurance in the state, members of the funds are assessed to pay certain claims of the insolvent insurer. A particular state's fund assesses its members based on their respective written premiums in the state for the classes of insurance in which the insolvent insurer was engaged. Assessments are generally limited for any year to one or two percent of premiums written per year, depending on the state.

Under insurance guaranty fund laws in each state, the District of Columbia and Puerto Rico, insurers licensed to do business can be assessed by state insurance guaranty associations for certain obligations of insolvent insurance companies to policyholders and claimants. Part of the assessments paid by/refunded to the Company pursuant to these laws may be used as credits for a portion of the associated premium taxes. Valuation Inputs for Investments

The Company's investment manager for the Company's general account (a registered investment adviser under the Investment Advisers Act of 1940), with oversight by the Company's Investment Management Department and its Finance and Investment Committee ("FIC"), a committee co-chaired by the Chief Investment Officer and the Chief Risk Officer of the Company, estimates the fair value for financial assets held in the Company's general account based on the framework established in the fair value accounting guidance. The Company reviews its investment manager's pricing policy on a periodic basis, with any changes to be approved by the FIC. The Company reserves the right to take exception to its investment manager's pricing of a particular asset and, with FIC's approval, to adjust the price received from its investment manager for that particular asset. The following section categorizes the inputs in the valuation techniques used to measure fair value into three broad Levels (Level 1, 2, or 3):

For Level 1 investments, valuations are based on quoted prices for identical assets in active markets that the Company has the ability to access at the measurement date.

For the Company's Level 2 and 3 bond securities, typical inputs used by pricing techniques include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids, offers, and/or estimated cash flows, prepayment speeds, and default rates.

A description of additional inputs used in the Company's Level 2 and Level 3 measurements is included in the following discussion:

Level 2 The fair values of most of the Company's Level 2 investments are determined by management after considering prices received from third-party pricing services. These investments primarily include bonds.

Level 3 The Company had no securities classified as Level 3 in 2021 and 2020.
